

Videoconferencing Protocols

The same standards and expectations of behaviour and conduct we have at school also apply when learning online.

When on a videoconference:

Follow the Student Code of Co - operation listed in our Student Organiser page E

Keep your mic on mute unless you are asked to share, or if it is an open discussion. This helps to cut down on background noise and distractions.

Always demonstrate our school values and be respectful to other participants as listed in our Student Organiser - REAL pledge page G

Wear appropriate clothing – save your PJ's for after school and weekends.

Keep videoconference information private, to ensure the safety and security of our class.

Your bed is for sleeping, not videoconferencing! Join us from your desk or kitchen table.

Maintain the privacy and security of everyone by refraining from filming, recording or sharing content from Webex.

Eat and drink once your videoconference has finished.

Keep your personal information safe and private. Have a blank wall behind you when on camera and put away anything around you that your camera can show that can identify you.

Get up and move around during the day - do some stretches, dunk some hoops, go for a walk or a bike ride and be active whenever you can.
